

ZISHAN IRFAN VHORA

✉ zishanvhora.dev@gmail.com | [in Zishan Vhora](#) | [zishanvhora.me](#) | [VhoraZishan](#)

SUMMARY

Computer Engineering student with a focus on backend development and systems engineering. Experienced in building APIs, backend services, and deploying full-stack applications using Python, FastAPI, and modern web technologies. Interested in developing scalable systems and solving real-world engineering problems.

EXPERIENCE

Software Developer Intern

Parul Chemicals

Feb 2026 – Present

Vadodara, Gujarat

- Designed and implemented a fully dynamic Role-Based Access Control (RBAC) system with database-driven permissions, enabling runtime role creation and management across 30+ granular permissions.
- Built a role management dashboard allowing administrators to create custom roles and assign or revoke permissions through an interactive UI.

Student Training and Placement Coordinator

Sardar Vallabhbhai Patel Institute of Technology

Feb 2025 – Present

Vasad, Gujarat

- Coordinated with a team of 8 members to organize mock placement drives for 200+ students, simulating real recruitment processes.
- Assisted in the execution of official campus placement drives by managing logistics, invigilation, and event coordination.
- Conducted seminars and awareness sessions on resume building and placement preparation for students.
- Participated in the recruitment of junior coordinators by conducting interviews alongside faculty members.
- Automated internal data workflows using Google Apps Script, improving efficiency in result and student data management.

SKILLS

- Programming Languages:** Python, Java, JavaScript, SQL, C, PHP
- Backend & Web Technologies:** FastAPI, Flask, Django, HTML, CSS, Supabase
- Databases:** MySQL, PostgreSQL, SQLAlchemy
- Cloud & Deployment:** Vercel, Render, Google Cloud (Basics), Linux
- Data & Machine Learning:** Pandas, NumPy, scikit-learn, Jupyter Notebook
- Tools & Collaboration:** Git, GitHub, Process Automation, Team Collaboration

PROJECTS

CareFlow Nexus – Hospital Resource Orchestration System

FastAPI, Python, Firebase, Render

[Live App](#) | [GitHub](#)

- Designed the system architecture and API contracts governing interactions between frontend, backend services, agents, and the real-time data store.
- Built a FastAPI-based backend in Python to orchestrate real-time hospital workflows through well-defined REST APIs.
- Integrated Firebase for real-time data synchronization and deployed frontend, backend, and agent services across Vercel and Render.

BunkStop – Attendance Tracker Web Application

React, Supabase (PostgreSQL), Vercel

[Live App](#) | [GitHub](#)

- Refactored backend logic of a live application to improve maintainability and performance for 30+ active users.
- Executed a data migration between Supabase database instances while preserving data integrity.
- Redesigned the database schema and managed the end-to-end deployment pipeline on Vercel.

EDUCATION

Sardar Vallabhbhai Patel Institute of Technology, Vasad

Bachelor of Computer Engineering

2024 – 2027

CPI: 7.48

Polytechnic, Maharaja Sayajirao University of Baroda

Diploma in Computer Engineering

2021 – 2024

CPI: 7.07

CERTIFICATIONS

Code Unnati Foundation Course – Python, Data Analysis, Machine Learning, SAP Conversational AI
