SUMMARY

Computer Engineering student with experience developing backend systems and full-stack applications using Python and modern web technologies. Worked on workflow automation and process improvement through scripts and automation tools. Interested in Software Quality Engineering, Automation Testing, and building reliable software systems.

EXPERIENCE

Joint Chief Training & Placement Coordinator

Jun 2026 – Present

Sardar Vallabhbhai Patel Institute of Technology, Vasad, Gujarat

- Promoted from Student T&P Coordinator; contributed to planning and execution of campus placement activities with a team of 8+ coordinators for 200+ students.
- Built and automated the student application workflow using Google Apps Script — form processing, test link distribution, and round-wise result aggregation to reduce manual effort.
- Supported mock placement drives, official recruitment activities, student engagement, logistics, and coordinator operations.

Creative Head

Mar 2026 – Present

ACM SVIT Student Chapter, Vasad, Gujarat

- Built an automated n8n workflow: reads participant data from Google Sheets, generates personalised certificates, and bulk-delivers via email — processing 50+ certificates with zero manual effort.
- Coordinated student enrollment outreach for ACM India Summer School 2026; helped design visual assets and branding for the chapter's inauguration.

Software Developer Intern

Feb 2026 – Present

Parul Chemicals, Vadodara, Gujarat

- Designed and implemented a fully dynamic Role-Based Access Control (RBAC) system with database-driven permissions enabling runtime role creation across 30+ configurable permissions; built an admin dashboard for role and permission management.
- Built a centralized lead management system that aggregates leads from multiple platforms and streamlines tracking and operational workflows.
- Performed manual functional validation of internal web applications by executing user workflows, identifying usability and logic issues, and providing structured feedback during development cycles.

SKILLS

- **Languages:** Python, Java, JavaScript, SQL
- **Frameworks & Web:** FastAPI, Flask, Django, HTML, CSS
- **Databases:** MySQL, Supabase (PostgreSQL)
- **Tools & Automation:** Git, GitHub, Linux, Postman, Swagger UI, n8n, Google Apps Script
- **Deployment:** Vercel, Render

PROJECTS

IntelliPrep – Adaptive Technical Assessment Platform

[Live App](#) | [GitHub](#)

FastAPI, Python, PostgreSQL, Jinja2

- Built an adaptive assessment platform that dynamically generates aptitude and programming tests from a structured question bank with domain and difficulty constraints.
- Implemented analytics capturing response time, correctness, topic coverage, and performance to enable personalised follow-up assessments.
- Designed session controls and backend logic to maintain assessment integrity and attempt consistency.

BunkStop – Student Attendance Tracker

[Live App](#) | [GitHub](#)

React, Supabase (PostgreSQL), Vercel

- Contributed to backend improvements and application maintenance for a live attendance tracking platform used by 30+ active users.
- Executed database migration between Supabase instances while preserving application continuity and data consistency.
- Redesigned database schema and supported end-to-end deployment workflows on Vercel.

EDUCATION

Sardar Vallabhbhai Patel Institute of Technology, Vasad

2024 – 2027

Bachelor of Computer Engineering

CPI: 7.48

Polytechnic, Maharaja Sayajirao University of Baroda

2021 – 2024

Diploma in Computer Engineering

CPI: 7.07

CERTIFICATIONS

Code Unnati Program (Foundation + Advanced) – Python, Data Analysis, Machine Learning, Artificial Intelligence, Deep Learning, Edge Computing, SAP Analytics Cloud, SAP ABAP on Business Technology Platform (BTP)
